ABOUT ME

As a final-year Information Technology student at University of Sargodha and former Android Developer at Enfotrix Pvt Limited, I have utilized over a year of experience in Kotlin and Java, later expanding into full-stack development with Node.js, React, and Python (Flask API) for machine learning development, along with server-side expertise in website and app deployment. I possess strong programming skills in Kotlin and C++, which I can demonstrate.

WORK EXPERIENCE

Since May 2023, I've developed Android apps at Enfotrix, skilled in Kotlin, Java, MVVM, Firebase, and REST APIs, with expertise in full-stack tools like Node.js, React, and Python (Flask API) and deployment on Hostinger and Google Play Console.

Enfotrix Pvt Limited [20/05/2023 – 10/09/2024]

City: sargodha | **Country:** Pakistan

Projects

Life Changer(Finance management system user and admin Android app)

- Developed investment features with flexible withdrawals.
- Admin-managed profit distribution for users(A complete banking app).
- Android apps now includes MVVM, LiveData, Retrofit,Room db, APIs, and messaging services.

CGS(School Management System)

- Built a school management system with apps for teachers, students, and the principal.
- Teachers mark attendance, publish exam results, manage diary and also can manage fee.
- Principal accesses comprehensive school statistics.
- Students can see results, attendance, daily diary and their dues .

Essenctia

- Browse food categories for quick and easy selection.
- Send inquiries via Gmail for personalized user support.
- Enjoy a user-friendly interface for smooth navigation

Quick Bite
- Developed **Quick Bite**, a food delivery app for easy and efficient meal ordering.
- Features include a user-friendly interface, real-time order tracking, and updates.
- Connects users with diverse local food options, enhancing convenience and accessibility.
